Blank-firing guns were developed as a legal means of defending oneself in emergencies. Just by looking dangerous or making a loud noise, they can make an attacker think twice. They can also fire tear gas or pepper cartridges. All of this gives the user a feeling of safety. Another big advantage is that they can be purchased over the counter by anyone 18 or older. Our models are also ideal for building a collection of superbly engineered guns. We manufacture licensed replicas of numerous renowned models, giving collectors a wide choice. These licensed models are authentic all the way to their markings.

# T4E

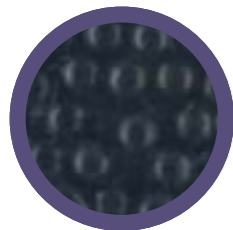

# T4E — WHAT'S THAT?

T4E stands for "Training for Engagement", a new Umarex generation of high-end training weapons for chalk balls, rubber balls and paintballs. These guns also take pepper balls, which are ideal for self-defense. Powered by CO<sub>2</sub> cartridges that produce a muzzle energy of 4 to 16 Joules depending on the model, they generate a realistic blowback effect.

In law enforcement, trouble-free, effective training for real emergencies is well worthwhile. The Walther PPQ M2 in 9 mm Luger, prized as a service pistol by special units and law enforcement authorities, is now also available in a .43-caliber T4E version! Realistic, safe, low-cost training is finally possible.

And for safety at home there's the new Home Defense Revolver 50. This large-caliber gun is a real powerhouse - perfect for self-defense in your own four walls.

# HOME DEFENSE REVOLVER T4E HDR 50

Top-of-the-line home defense: The HDR 50 is a revolver with visible strengths - large caliber (.50), enormous muzzle energy and an imposing appearance. The easy-to-load rotary magazine holds six .50-caliber projectiles that are fired at up to 11 Joules. Power is supplied by a CO<sub>2</sub> cartridge located in the grip. A light blow at the bottom suffices to pierce it. Thus the Home Defense Revolver 50 is ready to use at any time and has full cartridges when you need them. Its looks are impressive too. The all-metal design, broad form and remarkable size are bound to scare any attacker. The textured frame surfaces give you a secure grip even in stress situations, and a trigger blade safety prevents accidental firing if you should ever drop the gun.

2.4757.1 - T4E HDR 50 SPARE CLIPS, 2PCS.

## T4E

# PERSONAL DEFENSE PISTOL

# PERSONAL DEFENSE PISTOL

Item no.	2.2050-1	2.2051-1	2.2052-1
Cartridge	Black	Pink	White
Length	125 mm	125 mm	125 mm
Height	120 mm	120 mm	120 mm
Weight	107 g	107 g	107 g

The Walther PDP (Personal Defense Pistol), which comes in white, pink or black, looks a lot like a pistol and is just as easy to use. Pull the trigger to generate several strong spray bursts with a range of up to six meters. A grip safety prevents inadvertent activation. The frame of the PDP is textured to give you a good grip. The propellant cartridge is loaded by means of a break barrel, and a small viewport allows you to check the color of the cartridge: teargas (black), pepper gel (red) or plain water for training (white).

# PROSECUR MARKING CARTRIDGE

Walther PDP Marking Spray red, with UV marking

Item no.	2.2050.6
Cartridge	Red
Filling quantity	11 ml
Approx. range	6 m

Approx. range	6 m

Item no.	2.2050.3
Cartridge	Water (training)
Filling quantity	11 ml
Approx. range	6 m

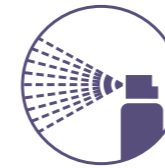

# DEFENSE SPRAYS

Millions of people all over the world rely on defense sprays for protection when jogging, walking through town or going to work – and they're wise to do so! These little companions not only help to deescalate unpleasant situations, they are also discreet. Defense sprays are usually compact enough to fit in a small bag and often weigh as little as 100 g. Umarex products are of police quality and use reliable technology.

## PROSECUR PEPPER SPRAY

These two sprays with their proven pepper mixture are identical in terms of size and content but differ in function. The 2.2013 spray releases a conical jet that spreads out quickly. The 2.2014 spray has a concentrated ballistic jet.

Item no.	<b>2.2013</b>
Content	53 ml
Approx. range	3 m
Height	105 mm
Weight	75 g

Item no.	<b>2.2014</b>
Content	53 ml
Approx. range	5 m
Height	105 mm
Weight	75 g

Both sprays have a 74 ml charge for longer use. Both also give you a choice between a wide conical jet and a long-range ballistic jet.

## PROSECUR PEPPER GEL

Walther ProSecur Pepper Gel is distinguished by its long range and precision. The ballistic jet can hit attackers as far as 4.5 meters away, even in wind. The big advantage of gel is that it sticks where it lands and the jet is so narrow that you can use it indoors for self-defense without contaminating the surroundings or getting it on yourself. The red dye in the gel marks the aggressor and lets you identify him later.

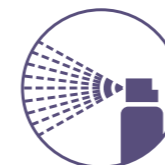

Item no.	<b>2.2022</b>
Content	50 ml
Approx. range	4,5 m
Height	115 mm
Weight	125 g

## PROSECUR PEPPER SPRAY

This ProSecur spray is probably the least conspicuous and most compact means of defense you can carry. You can keep it with you at all times and be sure that, small as it is, it can do its job well. The conical jet contains a 10 % OC solution and a 1.33 % concentration of major capsaicinoids – a formula also favored by authorities.

Item no.	<b>2.2012</b>
Content	16 ml
Approx. range	1,5 m
Height	82 mm
Weight	22 g

Item no.	<b>2.2015</b>
Content	74 ml
Approx. range	5 m
Height	125 mm
Weight	100 g

Item no.	<b>2.2016</b>
Content	74 ml
Approx. range	6 m
Height	125 mm
Weight	100 g

# PROSECUR PEPPER SPRAY 360°

Item no.	<b>2.2023</b>
Content	40 ml
Approx. range	4 m
Height	105 mm
Weight	95 g

Thanks to a new technology, the Walther ProSecur Spray can be used from any position in a 360 degrees angle. It's no longer necessary to hold the can in an upright position, as was the case with sprays of the first generation. In addition,

the new Walther ProSecur contains an additive that is visible only under UV light. This permits identification of the aggressor at a later time. Walther ProSecur Spray, a reliable companion in difficult situations, is now easier to use than ever.

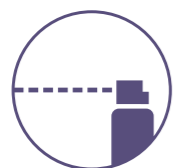

# PROSECUR MARKING SPRAYS

Item no.	<b>2.2100</b>
Cartridge	Blue
Filling quantity	50 ml
Approx. range	7 m
Height	112 mm
Weight	78 g

It won't repel attackers, but it will help to find them later. Prosecur marking spray leaves easily identifiable red or blue dye marks. And the special UV dye is visible under ultraviolet light - even days later. Attackers won't get far.

Item no.	<b>2.2101</b>

Weight	78 g

# PROSECUR TRAINING SPRAY

Item no.	<b>2.2024</b>
Content	54 ml
Approx. range	6 m
Height	105 mm
Weight	75 g

Practice makes perfect. Many people have pepper spray ready for use at home or carry it when they go out. And although it's easy to use, a little practice never hurts. In fact, if you're familiar with handling pepper spray, you'll have an easier time if you're ever in a pinch. Walther ProSecur training spray is ideal for practicing. It works just like the real thing but uses only plain water. Recommended as an additional product for first-time buyers and for keeping in practice.

## PROSECUR BEAR DEFENDER

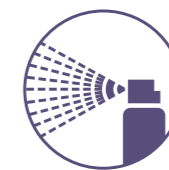

## PROSECUR HOME DEFENSE

Item no.	<b>2.2021</b>
Content	225 ml
Approx. range	10 m
Height	217 mm
Weight	310 g

The Walther ProSecur Bear Defender is currently the strongest animal-defense spray available for civilian use. This is because it has a 2% concentration of major capsaicinoids – as a rule, the concentration of the five major capsaicinoids in civilian and law enforcement defense sprays ranges from 0.18 to 1.33%. The sturdy holding ring on the valve has a fluorescent safety slide which helps the user to aim the formidable jet with its range of up to 10 m. This powerful defense device has a substantial 225 ml charge and comes with a top-quality holster, allowing it to be taken anywhere.

WITH FLUORESCENT GRIP, INCL. HOLSTER

Item no.	<b>2.2020</b>
Content	370 ml
Approx. range	8 m
Height	235 mm
Weight	550 g

The giant in the Walther ProSecur defense spray series has an impressive 370 ml capacity and a practical pistol grip with a large button to facilitate aiming. A well-positioned safety pin provides security. The conical jet has a range of up to 8 m. A practical wall bracket is included.

INCL. WALL BRACKET

# STOP ATTACK CS-SPRAY

A highly effective, legal means of self-defense – the Perfecta Stop Attack CS spray (tear gas, which is 2-chlorobenzal-malonitrile) gives you valuable seconds to flee from an attacker. Generates a dense cloud.

Item no.	<b>2.1902</b>
Content	40 ml
Approx. range	2 m
Height	85 mm
Weight	47 g

# STOP ATTACK PEPPER SPRAY

Take it wherever you go, because what good is the best protection if it's at home on your dresser? The active ingredient OC (oleoresin capsicum), better known as pepper spray, can be released as a diffuse fog or as a thin, but long-range ballistic jet.

Item no.	<b>2.1903</b>
Content	15 ml
Approx. range	3 m
Height	90 mm
Weight	35 g

Item no.	<b>2.1904</b>
Content	40 ml
Approx. range	4 m
Height	85 mm
Weight	50 g

Item no.	<b>2.1905</b>
Content	50 ml
Approx. range	5 m
Height	110 mm
Weight	65 g

# STOP ATTACK XTREME PEPPER SPRAY

The active ingredient OC (oleoresin capsicum), better known as pepper spray, can be released as a diffuse fog or as a thin, but long-range ballistic jet. With the maximum permissible concentration of 15 % OC.

Item no.	<b>2.1906</b>
Content	40 ml
Approx. range	4 m
Height	85 mm
Weight	50 g

Item no.	<b>2.1907</b>
Content	50 ml
Approx. range	5 m
Height	110 mm
Weight	65 g

# DEFENSE BATONS

Like defense sprays, telescopic batons are a practical means of defense in emergencies. A heavy shake extends them to full length, turning them into a solid steel unit. Walther telescopic batons have textured grips to ensure perfect handling. They come with a nylon holster to keep them ready for use at all times, retracted or extended.

**2.1914 — TELESCOPIC DEFENSE BATON**

17" Steel, black, elastomer grip, Incl. nylon holster

Length extended	410 mm
Length retracted	170 mm
Weight	370 g

**2.1908 — TELESCOPIC DEFENSE BATON**

21" Steel, black, elastomer grip, Incl. nylon holster

Length extended	530 mm
Length retracted	210 mm
Weight	465 g

**2.1910 — TELESCOPIC DEFENSE BATON**

21" Steel, chromed, elastomer grip, Incl. nylon holster

Length extended	530 mm
Length retracted	210 mm
Weight	425 g

**2.1918 — TELESCOPIC DEFENSE BATON**

22" Carbon, black, elastomer grip, Incl. nylon holster

Length extended	560 mm
Length retracted	235 mm
Weight	257 g

**2.1901 — TELESCOPIC DEFENSE BATON**

25" Steel, black, foam rubber, Incl. nylon holster

Length extended	640 mm
Length retracted	245 mm
Weight	540 g

**2.1913 — TELESCOPIC DEFENSE BATON**

25" Steel, black, elastomer grip, Incl. nylon holster

Length extended	650 mm
Length retracted	225 mm
Weight	538 g

# WALTHER TACTICAL GUARD SERIES

Possible power-sources, for example here with a TGS60r

#### MULTI BATTERY SYSTEM

The Multi Battery System, abbreviated MBS, which is used in many Walther TGS Lights provides a choice of using several battery or accumulator types, so that the flashlight can be adapted flexibly to your needs and individual circumstances (for example accumulators at home, where they can be recharged quickly and batteries outdoors).

# WALTHER TACTICAL FLASHLIGHTS

Designed for tough jobs: The flashlights in the Tactical Guard Series are intended on the one hand for people who depend on them in their work. But they're also ideal for recreational use. Rugged and powerful, they can withstand long periods of use. With at least two light output levels and a wide range of useful accessories like color filters, remote switches and mounts, these easy-to-use flashlights quickly become indispensable companions at work, in outdoor activities and everyday life. The output values of our TGS flashlights were determined according to the strict ANSI FL1 standard.

In 2009 the American National Standards Institute (ANSI) published the „Flashlight Basic Performance Standard“ (FL1). Now one can compare flashlights of different manufacturers with neutral means. All Walther TGS Lights were made and tested according to ANSI FL1, you'll find the icons with each product within this catalogue.

TGS 60 / TGS 60r

TGS 80

# TGS 10

MAX  
230  
LUMENS

The TGS 10 provides maximum performance with minimum dimensions. Measuring barely 100 mm in length, it's the space-saver in the TGS series, designed so that you can take it wherever you go. The compact aluminum housing holds a Cree XP-G chip with a maximum output of 230 Lumens, reducible to 23 Lumens so that you can use it ten times longer. Powered by a CR123 battery, watertight with a rating of IPX7 and equipped with a lanyard eyelet, the TGS 10 is a pocket-sized companion you'll never want to be without.

# TGS 40

MAX  
620  
LUMENS

The TGS 40 has everything that the Tactical Guard Series stands for: state-of-the-art features, intense output and a robust exterior. The Cree XM-L2 gives you optionally 600 or 60 Lumens and controls the Tactical Defense Strobe. Thanks to the multi-battery system (MBS) it can be powered by regular or rechargeable batteries. A DNA grabber at the front collects bits of skin when it makes contact with an attacker, allowing later identification. The TGS 40 is watertight to 15 m (as per IPX8) and comes with a practical clip.

IPX8 (watertight up to 15 m), batteries, lanyard, clip, replacement seal and tactical ring (rubber)

# TGS 20

MAX  
305  
LUMENS

With its multi-battery system (MBS) and wealth of practical features, the TGS 20 has more than earned its place in the Tactical Guard Series. The powerful Cree XP-G2 chip switches between two output levels, 300 and 30 Lumens, at the touch of a button. Inside, there's room for two CR123 batteries or one ICR18650 rechargeable battery, which can also power a defense strobe to ward off attackers. The aircraft aluminum body in tactical black gives the TGS 20 a fascinating rugged look. A practical clip is included.

# TGS 60/TGS 60r

MAX  
660  
LUMENS

The TGS 60r (3.7110) can be seen as the big brother of the TGS 60 (3.7109, figure below right). It is identical in appearance and also has an MBS. But this model comes with an ICR18650 rechargeable battery, which can deliver up to 660 Lumens. Among other features, it has a powerful Cree XM-L2 chip, Tactical Defense Strobe and watertight design (as per IPX8). As a member of the Tactical Guard Series it also has a plain, practical exterior. A non-slip grip, DNA grabber and clip add to the flashlight's high quality.

IPX8 (watertight up to 15 m), batteries, lanyard, clip, replacement seal and tactical ring (rubber)

# TGS 80

MAX  
700  
LUMENS

The power-packed TGS 80 is at the top of the Tactical Guard Series, with an intense beam and many practical features. A Cree XM-L2 chip delivers an impressive 700 Lumens and provides two additional Light output levels (100 and 10 %) plus a defense strobe (TDS). The TGS 80 is powered either by two CR123 batteries or - thanks to MBS - an ICR18650 rechargeable battery. Besides being easy to grip, it has no problem with water, because it is watertight to 15 m (with a rating of IPX8).

**3.7114 — COLOR FILTER**  
Red, blue, green for TGS 40 and 60r

# WALTHER SERVICE DETECTION LIGHTS

The Service Detection Lights were designed for exceptional jobs. Walther developed these reliable flashlights in cooperation with authorities. For example, they can easily be operated with gloves without compromising the special features. Two easy-to-use buttons are supplied for activating various functions, like different Light output levels, the Tactical Defense Strobe and the UV LED for checking ID papers and identifying liquids. A multi-battery system gives plenty of endurance and allows the use of several different battery types. The bodies are made of high-quality black aircraft aluminum, and the striking design emphasizes functionality: eyelets for the lanyard, a non-slip surface and anti-roll protection.

## SDL 400

MAX  
415  
LUMENS

The SDL 400 is the entry-level model in the Service Detection Light family and has all the features that make this series so interesting. It has a maximum output of 415 Lumens as measured by the ANSI standard, and even the second Light output level of 60 Lumens is adequate. The Tactical Defense Strobe and the UV LED (395 nm wavelength) can be activated quickly and easily.

IPX8 (watertight up to 15 m), MBS, batteries, manual, wrist strap, holding ring, replacement seal, clip

# OD40

The new OD40 is a long distance illuminator that projects a true collimated, focused beam of high definition light that has been created specifically for object and target identification. It creates a crisp, clean, clear, focused circle of light at long distances. The adjustable beam gives the natural eyesight the ability to function at its best without adverse reaction to reflected light. Constructed of aircraft grade aluminum, the Optical Dynamics OD40 is shockproof and resistant to water and momentary submersion. It is compact, lightweight and easy to handle, weighs just 14 ounces with the two included CR123A batteries that provide constant operation up to 100 minutes. Its CREE LED delivers up to 650 Lumens.

Item no.	<b>3.7700</b>
Light output*	max. 720 lm
Run time*	1:40 h
